Amanda was VERY keen on a makeover and says she loves the new look she ended up with.

Isn't it amazing what the right haircut, colour, shoes and clothes can do for a girl? Amanda Stuart certainly is proof of what can be achieved in a short space of time. Like all of us, she just needed the right tricks to get a more feminine look. She describes her normal style as tomboy-ish and herself as a jeans and T-shirt kind-of girl. "I don't do make-up normally, unless I'm going out. Normally that and my hair is just rough and ready," she laughs. But a new job and the loss of 7kg meant Amanda was keen for a spruce-up. "The hair I loved the most. The make-up's probably not completely me but it is me, if that makes sense. And I don't normally wear blue, but I loved that colour top." Stylist Louise Struber says Amanda was hesitant about jumping headfirst into a "new look". "But after a bit of coaxing she let us play her style up and the results are amazing," Louise says.

“We wanted to bring out Amanda's great eyes so they weren't lost behind her glasses. We used charcoal shades for a smoky look and brightened with a blue eyeliner”
